Description
This project will require you and one (ONLY ONE) team member write a paper suitable for a WCNC conference. The guidelines for this paper can be found at www.wcnc.org under Call for Papers.

Your goal is to pick one of the suitable topics, research the area, do some work in that area (theoretical, practical, models, etc) and then document your work.

To get an idea of the types of papers presented, look at the previous conference papers by going to the IEEE Xplore site ieeexplore.ieee.org and searching the keywords WCNC and 2003 (or 2002, 2001, etc). This will show you all of the papers. You can narrow the search by other subjects.

Papers will be graded on content and grammar.

Deliverable Dates
10/8/03  Submit proposal in email to me. Include your team members and a brief paragraph about the idea of the paper.
11/24/03  Submit final paper to me (dcallahan@ieee.org) on paper and in electronic form via email.
